To whom it may concern

I carried out a routine inspection of the Kilcreggan Urban Farms and found all of the animal husbandry to be of a satisfactory standard. All enclosures were examined and provide a proper living environment for all animals on farm. The diet and normal feeding habits were discussed with the farm manager along with the medical treatments given to all animals.

The overall animal health and welfare on the farm were of a high standard on the day of inspection.

Regards

Conor McAuley MRCVS BVMS
